# 1. Introduction

*Few words about Lost In Space Ecosystem*

## What is Lost In Space Ecosystem?

Lost In Space Ecosystem is an Elrond-based ecosystem that aims to create different **sources of income** for its participants and **secure the Elrond space** by creating a suite of dApps for developers and daily users.

## What is Lost In Space Ecosystem's Mission

Lost In Space Ecosystem's mission is to be recognized as a **top-tier project** on the Elrond network and to set a standard among Elrond projects by **building dApps, educating people, and creating long-term sources of passive revenue for users.**

## What is Lost In Space Ecosystem's Motivation

Lost In Space Team's motivation comes from the fact that a lot of people use the opportunity of DeFi only to create a source of income for THEMSELVES, instead of creating long-term projects that will truly help the users of a blockchain. **We are here to build, improve and innovate.**

—

# 2. Reward Systems

*How Lost In Space Ecosystem will reward its holders?*

## Reward system #1: Staking/Farming Pools

After the Lost In Space NFT collection is sold out, **\$120,000** will be allocated to create staking/farming pools, choosing the ones with **the biggest APY** (at this moment, the LKMEX pool - over 100% APY); Doing simple math, in one year, over **\$120,000 worth of LKMEX (if the price will be the same or higher than) will be redistributed** to our NFT owners.

People that own **1-5 NFTs** will receive the rewards of a **\$10,000** worth of LMEX pool.

People that own **6-10 NFTs** will receive the rewards of a **\$30,000** worth of LMEX pool.

People that own **+10 NFTs** will receive the rewards of a **\$60,000** worth of LMEX pool.

We will create an **additional \$20,000 worth of LKMEX pool** from where we will reward **top 10 NFT owners**.

*The redistribution of rewards will be automatically. NFT holders don't need to do any actions or to connect their wallet somewhere. Lost In Space team will use snapshots from <https://elrondscan.com/> in order to award the holders.*

## **Reward system #2: Income Redistribution**

In order to increase the floor price of Lost In Space NFTs, we will give back to holders **\$120,000 worth of EGLD** based of the number of sold NFTs as following:

1,000 NFTs sold = \$20,000 to be redistributed to top 100 holders (**\$200 worth of EGLD to each holder**);

5,000 NFTs sold = \$40,000 to be redistributed to top 200 holders (**\$200 worth of EGLD to each holder**);

10,000 NFTs sold = \$60,000 to be redistributed to top 200 holders (**\$300 worth of EGLD to each holder**);

*The redistribution of rewards will be automatically. NFT holders don't need to do any actions or to connect their wallet somewhere. Lost In Space team will use snapshots from <https://elrondscan.com/> in order to award the holders.*

### **Reward system #3: Royalty Redistribution**

As you know, every NFT project has a special tax on each transaction called royalty. Lost In Space NFTs will have 10% royalties - **6% will be redistributed to holders** through giveaways and **4% will be used for development.**

### **Reward system #4: Lost In Space Token & In-game power ups**

After all of our NFTs are sold out we will use the funds to:

- launch our native token: Lost In Space Token;
- start the development of our in-browser 2D game;

For both, every NFT holder will have benefits such as access to LIS token private sale, bonuses in the pre-sale, higher APY on staking/farming for LIS token, in-game power-ups and access to beta testing.

More details about LIS token and LIS web-game will be added to this whitepaper while we move further.

—

## **3. Board of administration**

*The privileges for top 10 holders*

Top 10 holders will be approached by the Lost In Space team in order to create a board of administration that will decide the future moves of our project. They will have access to our private meetings and will be able to set and track the goals of our ecosystem.

—

## 4. NFT Sale Phases & Prices

*How do we organize the sale phases of our NFTs?*

We will have 3 sale phases for our NFTs:

### **Phase 1: Private sale**

***Available for:*** *Whitelisted users (See more details about the whitelist process:*

*[discord.gg/9BjqxAnc3V](https://discord.gg/9BjqxAnc3V))*

***Mint price:*** *0.3 EGLD*

***Supply:*** *1,000 NFTs*

### **Phase 2: Public pre-sale**

***Available for:*** *For everybody*

***Mint price:*** *0.4 EGLD*

***Supply:*** *2,000 NFTs*

### **Phase 3: Public sale**

***Available for:*** *For everybody*

***Mint price:*** *0.5 EGLD*

***Supply:*** *7,000 NFTs*

This phase will be divided in three drop rounds as following:

**1st drop:** 2,000 NFTs

**2nd drop:** 2,500 NFTs

**3rd drop:** 2,500 NFTs

—

## 5. Budget Allocation

*How will we organize our budget?*

After each sale phase is completed, our treasury will have 4600 EGLD (approx. \$690,000 if 1 EGLD = \$150) and those funds will be used as following:

- \$120,000 for “Reward system #1”;
- \$120,000 for “Reward system #2”;
- \$200,000 for Dapps & Game Development;
- \$50,000 for LLC Creation & Administration;
  - \$100,000 for Marketing;
  - \$100,000 for Core Team;

*All of our wallets will be posted on this whitepaper, so our investors will be able to track them using Elrond’s block explorer.*

—

## 6. Marketing

*What is our marketing strategy?*

As we just launched our Social Media channels we are focused on organic growth - no paid followers or Discord members; We want to push organic growth as much as possible using giveaways and our reward systems.

After the private-sale round, we will start to use 3rd party methods to boost our marketing: influencer campaigns, paid PR campaigns on Yahoo Finance, Bloomberg, Nasdaq, MarketWatch and Benzinga.

---

## 7. Team

Our team is built from two Web3 developers with over 10 years of experience in React.js/Next.js and Solidity, one full-stack Rust developer and two co-founders: one of them is currently running a DeFi ecosystem on Binance Smart Chain with a market cap of \$1,4 millions and over 5,000 holders.

The core team (the 2 co-founders) are planning to be doxxed right before the first sale phase (The Private Sale Phase), while the identity of developers will not be revealed in order to keep the competitive advantage.

---

**Thank you for your time and attention!**

As we said, this whitepaper will be updated periodically. We will announce publicly every modification that we made, on our Social Media Channels.
